## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-2, 4-6, 7-8, and 10-12 are rejected under 35 U.S.C. 102(b) as being anticipated by **Salvo** [US.4.097,855].

For claims 1-2 and 4-6, **Salvo** discloses an electronic tennis scoring system having remotely located score board which receives score information from the transmitters located on the players, see Figs.1-6.

For claims 7-8 and 10-12, the method claims are interpreted and rejected as claims 1-2 and 4-6 as stated above.

### *Claim Rejections - 35 USC § 103*

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any

Art Unit: 2632

evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 3 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over **Salvo**.

For claims 3 and 9, **Salvo** may not specifically disclose the type of the power supply that the display being driven, it would have been obvious to one ordinary skilled artisan to readily recognize that the display would need power supply to operate and using either DC power, AC/DC power or strictly AC power would not be an inventive concept rather than an obvious design choice as long as the power supply providing the needed operational power.

### ***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US patents 4,541,013; 5,027,102; 5,048,831; 5,574,422; 6,012,995; and 6,270,431 show various type of electronic game score board which receives game score from remote location via wired or wireless connections.
